

## **2016 Berlin Research Symposium on Culture and Creative Industries**

**Berlin, September 23rd 2016**

**at The Federal Ministry for Economic Affairs and Energy (Invalidenstrasse 48, 10115 Berlin)**

**8:00 AM – 6:00 PM**

The 2016 Berlin Research Symposium facilitates transnational exchange by connecting experts and professionals from scientific research, politics, economic affairs, media and the creative industries.

The symposium is hosted by the Federal Government's Centre of Excellence for the Cultural and Creative Industries as part of the Initiative for Cultural and Creative Industries.

The research symposium focuses on invigorating and expanding international relations in the Culture and Creative Industries by discussing the following two areas:

- What recent concepts exist in the international Culture and Creative Industries that are relevant for the German discourse?
- What role does autonomous innovation play in the Culture and Creative Industries, considering the industries' core is creative and not technology-based?

### **Topic I: International View on Culture and Creative Industries**

The conference will address itself to the following issues:

- How is the concept of Culture and Creative Industries understood and interpreted in international contexts?
- What status do the Culture and Creative Industries have around the globe?
- What economic, cultural and political strategies can be observed?
- How do German and international practices and approaches differ?

## **Culture and Creative Industries in the United States**

For years non-governmental organizations have shaped the discourse around the economic significance of the cultural sector. In 2014 the first official governmental report concerning „U.S. Arts and Cultural Production“ was published. The report, a collaboration between the Bureau of Economic Analysis (BEA) and the Department of Commerce and the National Endowment for the Arts (NEA), will be presented by NEA and BEA experts.

## **Global Significance of the Culture and Creative Industries**

Viewing the topic and the reports' reception from a global perspective is of high importance since the reports can be used as points of reference for numerous countries. Thus, the global perspective can also enrich the discussion in Germany.

The conference concentrates on the most important organizations and studies that address the topic:

- CISAC (Confédération Internationale des Sociétés d'Auteurs et Compositeurs)  
CISAC has recently published the most relevant report on the global culture and creative industries.
- UIS (UNESCO Institute for Statistics)  
UIS has published the newest study on cultural commerce
- UNCTAD (United Nations Conference on Trade and Development)  
UNCTAD's global creative industries report is in preparation

## **Topic II: Innovation in the Culture and Creative Industries**

The idea of innovation cannot be limited to just technological innovation. To understand the complex economic innovation processes within an economy, artistic and creative innovation needs to be considered next to technological innovation. At the moment recognizing and measuring culture or art-based innovation is difficult. To assess the complexity of economic processes, both creative and technological innovation-making need to be taken into account.

The conference will reflect on the following questions:

- How is creative innovation made measurable in international contexts?
- What approaches can we find in contemporary German discourse?
- What is the EFI's (Expertenkommission Forschung und Innovation) position?

## Schedule

**8:00 – 9:00 AM Admission (Please bring your ID!)**

### Reception

**9:10 AM Opening** Michael Söndermann / Gesa Birnkraut

**9:15 AM Greetings:** Brigitte Zypries (Parliamentary State Secretary at the Federal Ministry for Economic Affairs and Energy)

**9:30 AM Greetings:** Günter Winands (Head of Office at the Federal Commissioner for Culture and Media)

**9:40 AM Introduction:** State of the international research on Culture and Creative Industries, Michael Söndermann (Federal Government's Centre of Excellence for the Cultural and Creative Industries)
